

Meeting Minutes
Date: 29th July 2020
Time: 14:30-14:45
Place: Google Hangouts Call

The following are points from the meeting:

- I mentioned that I started working on obtaining cryptocurrency prices from Binance using Python. I managed to create a script from which I can get data for any coin in any time interval, ex 1m, 5m, 15m, 1d, etc.
- Dr. Ellul said that it would be beneficial to start researching on SDKs to extract tweets from Twitter in particular periods, especially in spikes and crashes of Bitcoin prices. For example, December 2017 and recent bullish run.
- We talked about the choice of study units which would help me in the final year project. Dr. Ellul suggested to attend lectures of the Classification Search and Optimisation and Digital Signal Processing study units during the Add/Drop period.
- We decided to plan a date for another meeting in around 2 weeks time with Dr. Albert Gatt.
- Dr. Ellul mentioned the importance of taking down minutes after meetings and that he had no problem with meetings being recorded.
